

Stainless Steel Products

We are stockists of all speciality stainless steel, high temperature stainless grades and corrosion resistant stainless grades – in multiple product forms, including stainless steel plate, round bar, tubing and structural forms. All stainless steel products can be cut to your exact requirements.

Aluminium Products

Aluminium is highly resistant to corrosion because of the thin layers of aluminium and silicon which prevent the underlying steel from oxidizing, especially with exposure to salts and chemicals that affect most metals.

We stock all complete range of aluminium products in various thicknesses and sizes, namely :- Flat Bar, Round Bar, Rec Tube, Round Tube, Channel and sheets.
